Chiliveri Rithvik

Hyderabad, India | chiliveririthvik444@gmail.com | +91 9063828549 | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Full-Stack Developer experienced in building and deploying scalable web and mobile applications across EdTech, healthcare, and AI automation. Skilled in designing type-safe backend services, optimizing database performance, building asynchronous workflows, and implementing CI/CD pipelines. Hands-on experience with React, Next.js, TypeScript, PostgreSQL, Redis, and AWS, including performance optimization, cloud deployment, and production application delivery.

Core Skills

Languages & Frameworks: TypeScript, JavaScript, Python, React.js, Next.js, React Native, Node.js, Express.js, NestJS, Fastify, Bun, tRPC
Frontend & UI: Redux Toolkit, Tailwind CSS, shadcn/ui, TanStack Query, React Flow, Expo
Backend & Databases: REST APIs, PostgreSQL, MongoDB, Redis, Prisma, Drizzle ORM, JWT, Better Auth, Zod
AI & Automation: Inngest, LangChain, LangGraph, FreeSWITCH, Background Job Processing, API Usage Metering
Testing: Grafana k6, Playwright, End-to-End Testing, API Performance Testing
Cloud & DevOps: AWS (EC2, ECS Fargate, RDS, ECR, S3, Lambda), Docker, Terraform, GitHub Actions, CI/CD, Railway, Vercel, Git

Work Experience

Zeto Studio, Hyderabad | *Full Stack Developer Fulltime* *May 2025 - Current*

Contributed to the development and deployment of enterprise applications across EdTech and AI-powered customer operations, working on full-stack architecture, backend optimization, workflow automation, performance testing, and cloud infrastructure.

Trunkie | Enterprise EdTech Platform

- Engineered and scaled a multi-tenant EdTech platform supporting over **100,000 users**, implementing dynamic Role-Based Access Control (**RBAC**) across 13 user roles with tenant-aware authorization and secure access management.
- Designed and developed **type-safe backend** services using **Bun, Fastify, tRPC, Zod, PostgreSQL**, and **Drizzle ORM**, implementing **RESTful APIs**, database integrations, and authorization workflows across academic and administrative modules.
- Reduced API response latency by **over 80%, from 3,000ms to under 600ms**, through PostgreSQL **query optimization**, database indexing, and **Redis caching.**
- Developed asynchronous AI processing pipelines using I**nngest,** implementing background job orchestration, token consumption tracking, and **API usage metering**. Built a visual workflow automation interface using React Flow for configuring **node-based AI workflows**.
- Developed a real-time school transport management system with **live bus tracking** and built cross-platform mobile features using **React Native, Expo,** and **Expo Router**, supporting organization-specific configurations and Android deployment workflows.
- Conducted **performance testing** across 15 API modules using **Grafana k6,** executing **94,968 requests with 20 concurrent virtual users**, achieving peak throughput of **76.8 requests/sec** and a **93.3% module pass rate**.
- Contributed to production infrastructure and deployment automation using **AWS ECS Fargate, RDS, ECR, S3, Terraform, Docker,** and **CI/CD pipelines**, supporting application containerization, backend deployment, and release operations.

Anantix | Omnichannel AI Automation Platform

- Architected and developed the frontend application using **Next.js, Redux Toolkit, and shadcn/ui,** building responsive interfaces for managing **AI agents**, customer interactions, and omnichannel automation workflows.
- Developed **automation workflows** across Voice, WhatsApp, and Email channels, integrating AI-driven customer interactions with backend services and communication management systems.
- Implemented automated voice communication using **FreeSWITCH** and dialplans for call routing and processing, alongside asynchronous **email automation using Inngest** and **cron jobs for event-driven** and **scheduled execution**.
- Managed application deployments on **Railway** and configured **CI/CD pipelines for AWS ECS**, automating containerized application builds and deployment processes.

Zeto Studio, Hyderabad | *Full Stack Developer Intern* *Jan 2025 - Apr 2025*

Call the Doctor | Full-Stack Healthcare Platform

- Independently architected and developed a healthcare platform across web, iOS, and Android using **React.js, React Native, and the T3 Stack**, owning frontend development, backend architecture, and application deployment.
- Designed and implemented **RESTful APIs, backend business logic, PostgreSQL** database integrations, and secure authentication using **Better Auth**, integrating **Razorpay** for payment processing and **Google Maps APIs** for real-time location tracking.
- Configured cloud infrastructure using **AWS EC2, Amazon S3,** and **Redis for hosting, object storage, and caching**. Deployed the web application and **published** mobile applications on the **Apple App Store** and **Google Play Store**.

Ops AI | AI Operations Platform

- Developed reusable frontend components using **React.js and shadcn/ui, implementing JWT-based authentication** and integrating **RESTful APIs** through **TanStack React Query** for asynchronous data fetching, caching, and server-state management.

Education

Vidya Jyothi institute of Technology 2021 - 2025

B.Tech in Computer Science and Engineering
